Helen's 1963 MGB Roadster

By Henry Hirschman

Helen and I bought our MGB new in February 1963 from Southside Rambler in Jacksonville for $2967.50.

Fast-forward to 1992 when we had it restored frame-up by Max Crouse and his son Jay in Florahome, Florida. They did a great job with fit and finish, hydraulics, electrics, interior-all of it.

With the help of MG Classics gurus Wayne Snook, Neil Nelson, Jim Hall and more lately Glenn Lenhard, Stuart Etheridge, and Mark Albright, we continue to enjoy driving the car weekly. It still puts smiles on our faces every time we smell that leather and hear the smooth, steady sound of the exhaust as we move down the road.

Jim Nolan is the reason I am writing this piece on the car. Several years ago, he suggested it and only recently have I been motivated to do so.

I would be remiss not to mention that the B is my dear wife Helen's car. It has been registered in her name since day one, and it is only through her benevolence that I get to drive the car. Furthermore, I should mention that shortly after Max, the restorer met Helen; he figured out that it was her car, and she was calling the shots. So money quickly became no object to the restoration. I doubt that Moss Motors would be in business today were it not for Max and Helen.

After Max restored the car in 92, Wayne Snook rebuilt the motor for us in 1999. To this day, oil pressure remains at 60 psi minimum on hot summer days.

Incidentally, on one trip to Hiawassee when oil showed up on the windshield, that was my clue to coast over the shoulder and shut the motor down, so no harm is done to the engine. The cause was the oil cooler hose blew off. This necessitated a Hall/Snook roadside hose re-route, the traces of which remain to this day.

This car has always been very reliable. Miraculously, the Prince of Darkness has stayed away. However, there are several upgrades. Max replaced the Lucas

fuel pump with an Auto Zone or Advance E fuel pump in 92, and so far, so good. A few years ago, Jim Hall installed the first Petronix distributor unit which several years later was replaced by Stuart Etheridge along with a high-voltage coil.

Before the aforementioned electrical upgrades, we bought a new set of SU carbs from Neil. Wayne installed and adjusted them. Since then, I've never had to mess with them.

Not only do we have so many valued friendships in our club, but there is no question we could not have maintained and enjoyed our MG all these many years without the support of MG Classics. For that, we are most thankful.
